

1. INTRODUCTION - DEMONSTRATION PHASE

Ithuthan final phase. Full project-a professor, external, friends munnadi demo panni kaamikarathu. Ithu than mark-a decide pannum phase.

A) Demo Flow - Video-la Neenga Pannathu Maadhiri: Step 1: Introduction - 'Hi, I am presenting PocketSmart AI, your budget planning assistant. Problem: Middle-class families overspend for home, party, jewelry. Solution: AI budget splitter using Gemini'.

Step 2: Show VS Code Structure: pocket_smart_ai folder open panni kaamikaringa. app/__init__.py, app/main.py, app/auth.py, app/planner.py, templates, static. Clean structure.

Step 3: Run the App: Terminal-la 'python -m app.main' type panni enter. 'Running on http://127.0.0.1:5000' varum. Browser-la /login open.

Step 4: Login Page Demo: Login page azhaga irukku. Email: pocketsmartai@gmail.com, Password: 123456 enter panni Login click. JWT token generate aaguthu.

Step 5: Dashboard Demo: 3 big cards: Home Planner, Party Planner, Jewelry Planner. Each card-ku icon. Explain panringa.

Step 6: Live Demo - Home Planner: Budget 10000, Room Living Room, Style Elegant, Items Sofa, Curtains enter -> Generate click. 2-3 sec la Gemini result: Sofa Rs 4000 (Tip: Buy from IKEA), Curtains Rs.3000, Lamp Rs.2000 etc. Total 10000 kulla. Wow factor.

Step 7: Live Demo - Party Planner: Party Type Birthday, Guests 40, Budget 15000, Venue Home enter -> Generate. Food Rs.6000, Decoration Rs.4000, Return gifts Rs.5000 split kaamikuthu.

Step 8: Live Demo - Jewelry Planner (Highlight): Occasion Wedding, Budget 20000, Metal Gold, Upload Saree Image (red saree). Generate -> AI paarthu 'Red saree ku antique gold choker, jhumka earrings match aagum, Rs.15000' nu sollum. Image matching feature professor-a impress pannum.

Step 9: Conclusion: 'This app saves money, time, uses AI. Future: Add voice, Tamil language, shop integration'. Thanks

B) Viva Questions Ready: Q: Gemini ku enna prompt? Q: Budget exceed bug-a epdi fix? Q: JWT enna? Itha ellam prepare pannom. Demo success-a mudinja project complete.

CODE IMPLEMENTATION - FINAL DEMO RUN:

```
# app/main.py - Demonstration Phase Final Code
# This file runs the complete PocketSmart AI app for demo

from app import create_app

app = create_app()

if __name__ == '__main__':
    print('='*50)
    print('PocketSmart AI Starting...')
    print('Project by: Your Name - Final Year Demo')
    print('='*50)
    print('Demo Credentials:')
    print('Email: pocketsmartai@gmail.com')
    print('Password: 123456')
    print('='*50)
    print('Opening: http://127.0.0.1:5000/login')
    print('Phases Covered:')
    print('3.Design, 4.Planning, 5.Development')
    print('6.Testing, 7.Documentation, 8.Demo')
    print('='*50)
    # Run on port 5000 for demo
    app.run(debug=True, host='0.0.0.0', port=5000)

# For Viva - Quick Recap Commands
# Terminal 1: pip install -r requirements.txt
# Terminal 2: python -m app.main
# Browser: http://127.0.0.1:5000/login -> Dashboard -> Test 10k budget

# Final Checklist for Demo Day
# [x] VS Code ready
# [x] Gemini API key in .env
# [x] Internet connected
# [x] Test login working
# [x] Saree image ready for jewelry test
# [x] 8 Phases PDF printed
```

CODE EXPLANATION:

1. create_app(): Flask app factory. Demo ku ithu than entry point. Import panni app object create.
 2. if __name__ == '__main__': Python standard. Direct-a file-a run panna than app.run() work aagum. Import panna run aagathu.
 3. print() Statements: Demo ku professional-a theriyannum. '='*50 lines. Starting message, Credentials, URL, Phases Covered ellam print pannom. Professor terminal-la paartha wow-nu solluvanga.
 4. Demo Credentials Print: pocketsmartai@gmail.com / 123456 print panni nyabagam padutharathu. Live demo la type panna easy.
 5. app.run(debug=True, host='0.0.0.0', port=5000): debug=True - Code maathina auto restart. host='0.0.0.0' - Local network la vere laptop-la kooda paakalaam. port 5000 standard Flask port.
 6. Viva Checklist Comments-a checklist maadhiri vechom. Demo day-ku munadi enna check pannanum-nu. Gemini API key, internet saree image ready, PDF printed.
 7. Final Flow: Itha run panna than video-la 127.0.0.1:5000 login page vanthuchu. Apram dashboard, 3 planners live demo. Ithu than final phase code. Project complete!
- All the best for your final demonstration!
